4. **Impact : People living in poverty especially women, children and youth including persons with disability (PWD) with secured access to and control over resources, and quality services leading to an improvement of their livelihood condition.**

#### 4.1 Impact level changes :

**People living in poverty especially women, children and youth including persons with disability (PWD) with secured access to and control over resources, and quality services leading to an improvement of their livelihood condition:**

In before they were not able to receive the sufficient food three times in a day. Now they are ensuring the sufficient food in their house through increasing purchasing power. So they increased food security as a result they have taken three times meal in a day. Most of them women are involved in IGA and they are economically empowered in their family level. In this year 391(27PWDs) families ensured there food security through involved the deferent's type of IGA & cumulative 2170 families increased their family's income & controlling their income. This change linked with project goal.

According to their view they are successful it is sustainable. In primary level they conduct problem analysis & priority and they also conduct the need assessment as per their capacity & contest.

#### **4.2 Women are empowered who report increased control over income and greater negotiating power within the household and community.**

In primary stage the women are neglected in their family because they are not able to involve in IGA & also defended to her husband. Now they are involved in various type of IGA and also contribute the additional income in their family. Women are also increased the skill & knowledge in various type of law & policy and they have taken collective action against any kinds of injustices at family & community level through reflection action process. In this year 320 women who report increased control over their income and household decisions & cumulative 1778, This year 7 Incidence of harmful traditional practices (Child marriage, Dowry) against women and girls reported formally & cumulative is 80. In this year 8 Incidence of harmful traditional practices (Child marriage) against women and girls reported informally last Year cumulative 109. In this year 2 of Incidence of GBV (DV, Sexual harassment, Violence, acid violence, etc.) Against women and girls reported formally & cumulative 47 case. In this year 3 case of Incidence of GBV (DV, Sexual harassment, violence, etc.) against women and girls reported informally cumulative 55 cases. In this year 312 of women who report increased active participation in community decision making process & cumulative 665 Women increased greater negotiating power within the household and community level. They believed that they are empowered in family & community level.

#### **4.3 # of women and man from marginalized communities received land and control over water bodies.**

Our 90% people are landless and bonded labor and they are not aware in land rights issue specially khas land. We organized them and create awareness on khas land issue through reflection action process now in this year 15 women 15 men received khas land from the government. Till now Total 122 landless people received 16.64 acre land from government. In the quarter the ministry of land has taken initiative on behalf of marginal farmer that, the department of land survey & record will rectification the record which was as the forest department. In this year 42 people (harassment by forest department) has petition on ETB rule of section 30 submitted to zonal settlement rangpur for record correction and the public hearing is ongoing. 8 women have legal ownership and get support from family & community that contributed control over natural resource particular land ability to make decision /use their land. They are free from bonded labor & living with dignity in community level. At first they are capacitate on land issue and they had taken initiatives to access it .they received the land through maintain the proper channel of government rules & regulation. They believed that it is great achievement to the landless people and they are united to receive more khas land from government.

#### **4.4 # of communities within the catchment area of 5 schools secured their right to quality primary education)**

In 2014 we started the journey on PRS issue. In previously the community people are not aware on this issue then we conduct the various type of training on PRS issue among the community leaders. Now 8 communities of 5 primary school s catchment areas are practicing & promote to quality education for primary level. As a result students are getting highest marks in public examination. In the last year 46 students appeared the PSC examination & 48 is JSC all student have passed in those examination and they also admitted in the school for next class. We think that it was continues process in community practices. When community leaders are capacitated on this issue and they

advocating in their community on PRS issue as a result community people are aware on PRS and practicing & promoting quality education and decreased the dropout rate in the year is 2% (Source of data – Government school) USS has provided technical support (capacity building) to community leaders & educational personnel and also playing facilitating role. AAB is playing strategic role and they are also providing capacity building support to the USS staffs & SMC/ PTA.

## **5. Outcome :**

1. People with strong support of the community are claiming rights on collective way.
2. Poor people's especially women, children and youth including persons with disability access to public resources & services enhanced. (Health. Social welfare. Upazila woman affairs, agricultural, land office, livestock).
3. Local govt. and different service providing institute become responsible to deliver their services to poor and person with disability (PWD) people securing democratic space and commitments for accountable to service delivery and gender responsive governance mechanisms.
4. Local Governments implementing progressive tax policies, regulatory systems and equitable distribution of resources for public service provision.
5. Women, girls, and youth including persons with disability have capacity and leadership developed to the extent that the culture of silence is broken and challenging against gender based violence, discrimination and harmful traditional practices and getting support from law and enforcing authority.
- 6.. Poor people's especially women, youth including persons with disability involved in alternative livelihood option along with CRSA that is more sustainable.
7. Quality education has promoted considering PRS in govt. primary school that enhanced inclusiveness considering CWDs and children's performance & potentiality

### **Outcome level changes**
